

Daily Scrum Meetings

Date: 09/06/2024

Attendees: Richard Chong, Andres Lopez, Michael Camelio, Carlos Ramirez, Jason Martinez

Start time: 9:45pm

End time: 10pm

- Student1: Richard Chong

- What have you done since the last scrum meeting?

Today I watched a video about the basics of react js and the fundamentals. I am now starting to get a grasp of the fundamentals.

- What is planned to be done until the next scrum meeting?

I plan on looking at the code that was left by the group from last semester and watching some other videos.

- What are the hurdles?

One of the hurdles I'm facing is getting used to the differences between react js and html. Although they are similar they have some major differences as well. Also understanding the code of the previous people is another hurdle.

- Student 2: Andres Lopez

- What have you done since the last scrum meeting?

I have reviewed react basics and gone over the code base

- What is planned to be done until the next scrum meeting?

I will review the video sent by Vincent and clean the old teams group so that everyone can join for the meeting.

- What are the hurdles?

None for this meeting.

- Student 3: Michael Camelio

- What have you done since the last scrum meeting?

Continue going over the code and identifying critical sections that are part of the buckets implementations.

Effectively set up the entire environment.

- What is planned to be done until the next scrum meeting?

Continue checking, understanding and improving the code to be compatible with AWS.

Continue preparing the environment to start running the web application locally

Outline all the AWS services needed for the application

- What are the hurdles?

Extensive review of documentation.

Manage errors and compatibility issues

- Student 4: Carlos Ramirez

- What have you done since the last scrum meeting?

Continue going over current code and begin to build an understanding of what currently exists.

- What is planned to be done until the next scrum meeting?

Continue going over the current database setup in order to fully understand the existing code and data available in order to be able to revise it and expand upon it to meet our needs. Begin to map out any possible improvements/issues.

- What are the hurdles?

Going through the existing database files and breaking it into parts in order to easier understand what the current system uses/can achieve in its current state and finding any already existing issues.

- Student 5: Jason Martinez

- What have you done since the last scrum meeting?

Figure out a way to understand the code of the github page.

- What is planned to be done until the next scrum meeting?

Continue trying to learn javascript

- What are the hurdles?

Learning a new programming language alongside HTML and CSS would be a daunting task.
