

Daily Scrum Meetings

Date: 09/15/2024

Attendees: Richard Chong, Andres Lopez, Michael Camelio, Carlos Ramirez, Jason Martinez

Start time: 8:00pm

End time: 8:15pm

- Student1: Richard Chong

- What have you done since the last scrum meeting?

Today I ended up looking at the code that was left behind by the other team and also, I watched another react/typescript video. I ended up installing React JS and getting the files from the repository. I was having some troubles with react js.

- What is planned to be done until the next scrum meeting?

I plan on trying to fix my react js to get it working properly so i can start working on the code.

- What are the hurdles?

One of the hurdles I'm facing is getting used to the differences between react js and html. Although they are similar they have some major differences as well. Also understanding the code of the previous people is another hurdle. Also, I have been having some trouble with React JS not wanting to work so I have to fix that.

- Student 2: Andres Lopez

- What have you done since the last scrum meeting?

I have reviewed react basics and gone over the code base

- What is planned to be done until the next scrum meeting?

I will review the video sent by Vincent and clean the old teams group so that everyone can join for the meeting.

- What are the hurdles?

None for this meeting.

- Student 3: Michael Camelio

- What have you done since the last scrum meeting?

Checked code and identified critical sections that are part of the buckets implementations.

- What is planned to be done until the next scrum meeting?

Continue reviewing the Back-End Code.

- What are the hurdles?

Time management.

- Student 4: Carlos Ramirez

- What have you done since the last scrum meeting?

Continue going over the current database setup in order to fully understand the existing code and data available in order to be able to revise it and expand upon it to meet our needs. Begin to map out any possible improvements/issues. Research more into packages used and if any better options could be used.

- What is planned to be done until the next scrum meeting?

Continue going over the code and begin testing with existing code.

- What are the hurdles?

Working with the currently used packages and determining whether or not it would be beneficial to replace them with the others and considering the overall effect this would have.

- Student 5: Jason Martinez

- What have you done since the last scrum meeting?

Worked more on understanding javascript, HTML, and CSS using Exercism in order to try practice problems.

- What is planned to be done until the next scrum meeting?

Try and figure out how React works in correlation to javascript.

- What are the hurdles?

Learning a new programming language alongside HTML and CSS would be a daunting task.
