

Daily Scrum Meetings

Date: 10/16/2024

Attendees: Richard Chong, Andres Lopez, Michael Camelio, Carlos Ramirez, Jason Martinez

Start time: 7:45pm

End time: 8:15pm

- Student1: Richard Chong

- What have you done since the last scrum meeting?

I have been working on updating the login form initially. I had some issues but I have resolved them. Also, I have worked on sharpening up and messing around with the login menu and seeing what may be the most optimal design for this project.

- What is planned to be done until the next scrum meeting?

I plan on adding some parameters for the login so it can be fully functional

- What are the hurdles?

Some hurdles im facing are that i need to wait on the database in order to truly test the login page and make sure that it is working properly and storing all the information

- Student 2: Andres Lopez

- What have you done since the last scrum meeting?

- Working on extending classes. Added an image analysis class that give sentiment on images, graphs etc.

- What is planned to be done until the next scrum meeting? Upload, and coordinate server and pypi official release.

- Update repo, create tasks for team mates for back log upload

- What are the hurdles?

- None

- Student 3: Michael Camelio

1. What have you done since the last scrum meeting?
 - Waiting for team members to run commands.
 - Fixed an issue with “sudoers”.
2. What is planned to be done until the next scrum meeting?
 - Connect old database with the new one
3. What are the hurdles?
 - Time management.
 - Missing code to migrate old database.

- Student 4: Carlos Ramirez

- What have you done since the last scrum meeting?

Research open source packages to use for our front end and design. Review previous modelsingleton.py and incorporate/adapt to our current build.

- What is planned to be done until the next scrum meeting?

Continue research on possible open source packages/ begin incorporating selected ones. Continue fixing the current chat page as well as possibly begin connection between our log-in / chat pages with our database.

- What are the hurdles?

Researching possible image generators in search of free API, have not been able to find one that meets our needs although I did find a possible usable plugin. Must now research further on how to implement this into our website and make it display correctly/adapt to our needs.

- Student 5: Jason Martinez

- What have you done since the last scrum meeting?

Researching and working on creating API endpoints for CRUD operations to interact with database (using FastAPI alongside PostgreSQL with SQLAlchemy)

- What is planned to be done until the next scrum meeting?

Beginning work on it starting tomorrow at the absolute latest.

- What are the hurdles?

Working with these api's for the first time and getting info from those may be a hurdle
