

Sprint Backlog Grooming

- Project: STARS GPT
- Attendees: Richard Chong, Andres Lopez, Micheal Camelio, Carlos Ramirez, Jason Martinez
- Start time: 9:15pm
- End time: 10pm

After discussion, we realized we would need to continue with the user stories/tasks assigned to this sprint as follows.

We decided that we can continue working on the code that was left behind by the other group, which was agreed upon by the rest of the group. Here is the list of user stories and/or tasks ordered based on their priority.

- Story 1: As the team leader I will be uploading documents to the discord server to quickly and efficiently manage our class documents.
 - 5 story points, upload documents to discord and manage them.
- Story 2: As a team member I will be working on setting up the interactions between the program and the database
 - 10 story points, set up postman to send and request successfully with OpenAI API.
 - 10 story point, Ensure correct interaction between the OpenAI API, EC2 and the Database.
- Story 4: As a member of the front end I will be developing the main menu/dashboard
 - 20 story points, I will look through streamlit site and docs to find a working front end that we can use to integrate our model with. (Start with streamlit chat applications and I will also be looking through the mongoDB documentation.
 - 10 story points, as a team member of the front end i will be implementing a database using mongodb and connecting form submission to the database.
 - 10 Story points, creating the database with mongoDB.
- Story 5: As a team member working on the back end I will set up the imports for future development and call in package format with Langchain and Streamlit.

- 5 story points, I will make it so users can use the import * from package methods.
- 5 story points, I will make it so users can import sets of functions under predefined names for ease of use.
- 5 story points, Will make it so users can directly call functions or classes without needing to use extended relative imports.
- Story 6: As a team member I will be working on setting up the SSL Certificate
 - 15 story points, set up SSL Certificates using Let's Encrypt via Certbo.

The team members were willing to work on the following user stories/tasks.

- Richard Chong willing to work on story 1, and for story 4
- Andres Lopez willing to work on story 2, 4, and 5
- Carlos Ramiez willing to work on Story 4 and 7.
- Michael Camelio, willing to work on story 2 and story 6.
- Jason Martinez, willing to story 6 and 2 for 30 points. (Making sure website displays correctly for 6 & subtasks for 2)
