

Sprint Backlog Grooming Meeting Minutes #3:

Attendees: Gigi Arbelo, Jonathan Gil, Nicholas Smith, Careca McRae

Start time: 7:30 PM

End time: 8:30 PM

The following User Stories make up our product backlog for this sprint session:

- User Story #1: Construct a website that educates users about security measures, to include modules, video training, educational resources etc.
- User Story #2: Develop a step-by-step training module that educates users in cyber security measures which leads to a certificate of completion at the end of the course.
- User Story #3: Provide training references such as websites, books, etc. for different areas in cyber security for user information purposes.
- User Story #11: Publish domain once our website is complete.
- User Story #12: Connect the site to Google Search console.

The user stories below are completed:

- User Story #4: Research different areas in cyber security measures that will provide cybersecurity training to individuals who use the site. For this user story, we chose to go with the website Wix.
- User Story #5: Find a website that provides a viable option to easily create and edit our website for the project in question.
- User Story #6: Create a document listing the different types of training modules we will have on our website.
- User Story #7: Create a custom favicon that compliments our website.
- User Story #8: Create the homepage of the website.
- User Story #9: Redesign our website's aesthetic to give it a cleaner and more user-friendly design.
- User Story #10: Edit our bio on the homepage to give users an introduction into who we are and what our purpose is.
