

Pablo

- Generating insights using the whole file
- When presenting insights, generate a few images that are related to the necessary changes/improvements etc.
 - **Example recommendation:** Increase password security requirements.
 - **Use chat GPT to generate a Dall-E prompt from the recommendation:** Illustration of a strong castle with a big lock.
 - **Generated image:**

- Generate a video that presents the company insights. ([Synthesia](#))
 - Use Chat GPT to create video script from insights and company & information.
 - Use Synthesia to generate a custom video that includes the company logo and more. (BETA)

Carlos

- **Generate infographics** related to the information on the generated report.
- **Dashboard reporting** to have a better view of the data.

Javier

- **AI-Powered File Annotations:**
 - Use ChatGPT to automatically generate summaries and annotations for uploaded documents, making it easier for users to understand and search through their content.
- **Enhanced Collaborative Editing:**
 - Integrate ChatGPT to suggest edits, improve writing, or translate text in collaborative documents in real-time.
- **AI-Driven Project Management:**
 - Use ChatGPT to assist in generating project plans, writing code documentation, or creating task descriptions based on brief inputs from users.
- **Mood Boards and Inspiration Galleries:**
 - Use DALL-E to generate images based on mood or theme inputs to inspire users in creative projects or brainstorming sessions.
- **Marketing Campaign Designer:**
 - Users can input campaign goals and target audience details, and the system would use ChatGPT to draft campaign text and DALL-E to design visual content
