

Daily Scrum Meeting Minutes:

Attendees: Jacob Schuster, Owen Weng, William Duran

Start time: 10:00 PM

End time: 11:00 PM

Jacob Schuster:

- How many hours did I work since the last meeting?
 - About 1 hour
- What was done since the last scrum meeting?
 - This is the first meeting, so we worked on planning the scope of the project as a group
 - I also did some preliminary research on AI tools to extract formulas / methods from research papers
- What is planned to be done until the next scrum meeting?
 - In the next meeting, I'll continue with the research. We're also meeting with the product owner tomorrow, so we should have a much better sense of what work needs to be done and how to begin
- What are the hurdles?
 - Right now the only hurdles are with scheduling. We're all full-time students so it can be difficult to find days when we're all free. I expect this to lessen as we progress through the semester and everyone's schedules become more regular

Owen Weng:

- How many hours did I work since the last meeting?
 - 1 hour
- What was done since the last scrum meeting?
 - Brainstorm some of the possible route we can take to complete the project in a timely manner
- What is planned to be done until the next scrum meeting?
 - We will begin researching the details of using AI in our projects and how to extract data from one database to other.
- What are the hurdles?
 - One thing is making time to meet with our group members and product owner, we are still working to find common free time to meet and discuss about our project.

William Duran:

- How many hours did I work since the last meeting?
 - 1 hour
- What was done since the last scrum meeting?
 - Researched some options for implementing the ai/machine learning features
- What is planned to be done until the next scrum meeting?
 - Research more about graph databases
- What are the hurdles?

- Setting meetings so that everyone can attend in person.
