

Sprint Backlog Grooming Meeting Minutes: Sprint 6

Project: **FIU Doctor Booking System**

Attendees: Mohammad Kazmi, Jason Eduardo Kildare, Wenjia Wang (PO)

Start time: 9:00 AM

End time: 9:30 AM

After discussion, the velocity of the team for the following spring was estimated to be **60 hours for the team**.

The product owner chose the following user stories to be done during the following sprint. They are ordered based on their priority.

- **User Story #1:** As a developer, I want to create a map of how data flows within the organization, and in/out of the organization. Mapping data flows requires information from individual departments and users. **164.308(a)(1)(ii)(A) (Security Rule)**
- **User Story #2:** As a developer, I want to commit all the changes in the code to the GitHub branch and merge it to the main.
- **User Story #3:** As a developer, I want to resolve the conflicts that arise while merging the branch in the admin, doctor, and user code files.
- **User Story #4:** As a developer, I want to create use-case diagrams from the user and the doctor's perspectives.
- **User Story #5:** As a developer, I want to create a poster presentation to show the contributions I made to the project and how useful they are to the development.
- **User Story #6:** As a developer, I want to demonstrate the functionality of the FIU Doctor Booking App and record a video to showcase the features developed throughout the semester.
- **User Story #7:** As a developer, I want to categorize all the user stories completed so far in the semester to security, privacy, and breach notification rules related to HIPAA constraints.
- **User Story #8:** As a developer, I want to collect, organize and create folders for all the deliverables for each Sprint and create a zip folder of these documents.

The team members indicated their willingness to work on the following user stories.

- **Mohammad Kazmi**
