

Cybersecurity Focus

Installation Guide

Community-Powered

Vulnerability Management

Team Members: Marlon Iglesias Diaz, Theodore Atis, Daniel Granados

Product Owner(s): Masoud Sadjadi

Mentor(s): Masoud Sadjadi

Instructor: Masoud Sadjadi

GitLab: No installation required.

Direct Link: gitlab.com

Greenbone Vulnerability Management (GreenBone Enterprise Trial): Installed through Docker container, or an Oracle Virtual Appliance (OVA).

Setup through Docker Container: greenbone.github.io/docs/latest/22.4/container/index.html

Setup through OVA: greenbone.net/en/testnow/#toggle-id-4-closed

OVA Setup was our preferred installation method, the steps are easy to follow on the page and guides through the entire OVA setup.
