

Cap II – CY – Fall 2023

Team: Community-Powered NVT Development for OpenVAS

Sprint Backlog Grooming Meeting Minutes

11/13/2023

Attendees: Marlon Iglesias Diaz, Theodore Atis, Daniel Granados

Start time: 5:00 PM

End time: 6:00 PM

The following user stories were created/discussed/refined/prioritized.

User Story #5 (Community-Powered Vulnerability Management):

- We are working towards presenting an overview of the Greenbone vulnerability management. Demonstrate the installation process and setup for scans to run with the Greenbone network scanner. Inform them on how to use scan configs to detect critical vulnerabilities such as Log4j. Create a nasl script that detects a recent CISCO device vulnerability. Provide an alternative to the Greenbone vulnerability management platform using GitLab's Continuous Integration/Continuous Delivery (CI/CD) to perform automated scans. Then pull it all together and demonstrate the risk management side of things.
- We are currently on schedule to complete the Sprint and complete the project discussion by the specified deadline.
