

How we can potentially support CUDA accelerator in the future:

<https://github.com/LazaroHurtado/micrograd-rs/discussions/1>

Deprecate Value struct: <https://github.com/LazaroHurtado/micrograd-rs/discussions/2>

Expanding Loss Functions Module:

<https://github.com/LazaroHurtado/micrograd-rs/discussions/4>

Expanding Weight Initialization Module:

<https://github.com/LazaroHurtado/micrograd-rs/discussions/3>

Expanding Activation Functions Module:

<https://github.com/LazaroHurtado/micrograd-rs/discussions/5>

Optional seed parameter for RNG-based features:

<https://github.com/LazaroHurtado/micrograd-rs/discussions/6>

Creating functionality for loading and storing model configurations and parameters:

<https://github.com/LazaroHurtado/micrograd-rs/discussions/12>
