End time: 7:30pm

What went wrong?

- Did we do a good job estimating our team's velocity?
 - productive, efficient, and organized sprint
- Did we do a good job estimating the points (time required) for each user story?
 - Sprint was a bit chaotic as everyone got accustomed to the new project
- Did each team member work as scheduled?
 - Making good progress so far

What went right?

- We managed to get a working feature, which is to detect whether internet is up/down

How to address the issues in the next sprint?

- How to improve the process?
 - It would help if everyone bought an arduino to follow along with the progress
- How to improve the product?
 - Would like to check if individual ports are open or closed
