

User Manual

Sign up: When a user first opens the Water Wand Application, they will be met with the Sign up screen. This screen will include two buttons: Sign up or Login as well as the email and password if they are already users. The password must be at least 6 characters long and it must include a upper, lower, digits.

Once the User has signed up they will be introduced to the following screen. The User Menu has the following options : Add Device – Notifications – Contact Us and Replay Onboarding. In the Add Device the user will find steps in how to connect their Water Wand IOT. Data Collection show the Data that has been

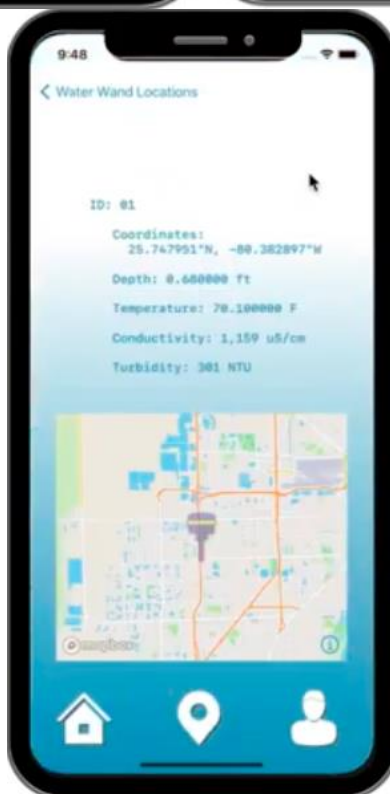

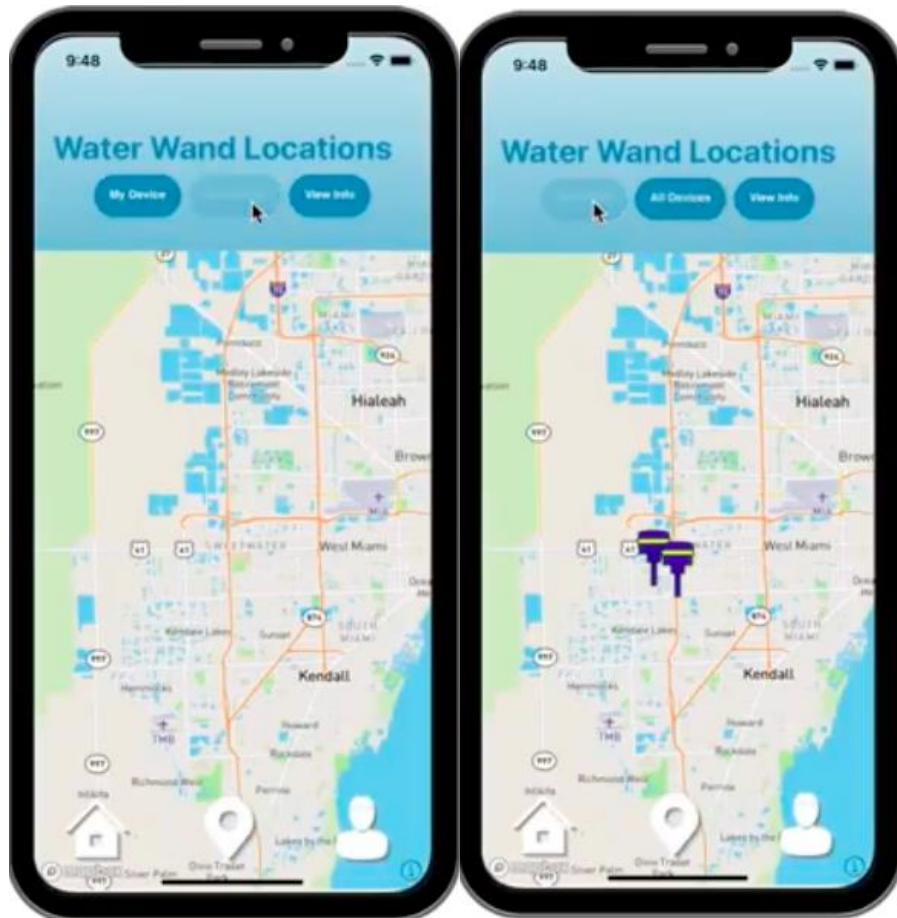

collected by the user. Notifications will show user important notifications they have selected. Continued by the Contact Page and Replay Onboarding.

The Water Wand Application contains three buttons Home, Map and Profile. In the Home Screen you will see the Water Wand Logo with a Button named About. Once clicked the button will show various widgets pages detailing what the application is about.

The next page is the Map page. In this page you will see a top Navigation Bar that includes three buttons: My Device, All Devices and View Info. When clicking the My Device button the screen should show the map and markers on the data collected on the map. When pressing the All Devices button you will be able to see all the Markers of data inputting within a certain radius on the Map in comparison to you location.

The last page is the Profile page where you can Sign up or Login. When either is done you will be sent to the Menu Page that was discussed previously.
