

User Manual

SignUp: When the user opens the application, they will see two buttons: sign up or Login. When the user clicks the Sign up page, they will see a screen where the user can enter their credentials such as name, email, and password. The password must be at least 6 characters for the creation of the account. If not, it will not allow the user to create their account. Once the user clicks on the “Confirm” button, they will be able to login with their new credentials.

Login: In the Login screen, the user will be able to put their credentials to login into the application such as their email and password. The Login button will turn bold once the credentials are successfully inputted. The user will also have the ability to reset password by clicking on the “Forgot Password” button. Once the user logs into their account, they will be redirected to the category screen.

Categories: This screen includes six links to the subcategories. These are: Medical, Surgical, Trauma, Toxicology, Foreign Ingestion, and Emergent Rashes. When clicking on any of these categories, the user is going to find a list of the subcategories which belongs to that specific category.

Subcategories: Inside the subcategory screen the user is going to find a list of all the subcategories for the specific category they pressed. This list is ordered alphabetically and has the same color as the category. Once the user clicks a specific subcategory, it will take him/her to the CatContentScreen.

CatContentScreen: This screen displays the subcategories' information including title, evaluation, medication, management. symptoms, references and images, every section can be clicked to expand on information.

Search: When the user enters the search category, it will open up a screen with a search bar in it. After entering a search term, the application will display the subcategories which contain that specific term. These will be direct links to those specific subcategories. If the term the user enters is not part of any subcategory's title, the screen will remain blank. If the user doesn't enter a term at all, and simply clicks the search button, all subcategories will be displayed.

Chatroom: when the user clicks on the chat tab of the bottom navigation, they will see the list of global and private chats. To create a new chat, the user can click on the 'Add' icon at the top right which will open up a dialog to pick between a global chat and a private chat. A global chat is a chat centered around a topic and can be accessed by all users. A private chat is a chat between two or more online users. Once the chat is created, they will be redirected into the chat where they can start sending messages. At the top right of each chat there is an 'Info' icon. When clicked, the user can see the chat details. If the user is the owner of a chat, they will be able to manage the participants of the chat or delete the entire chat.

Profile: The profile screen allows users to review personal information like name, job title, email, phone numbers, profile photo and set the user's active status. From here, you have several options, you can proceed to the Edit Profile Screen, in which users can edit the data being displayed in the profile, you can go to the Calendar Screen, or you can access the CME screen.

Calendar Screen: In this screen, users can create events with details such as event title, event notes, choose a start date and end date, an alert message will appear displaying event summary when the “Save changes” button is pressed, the event will be saved to the user device’s calendar, and an alert message for confirmation that the event was successfully saved will show up.

CME: In the CME tracker, the user can enter the name of the certificate select date of expiration, and choose the image. If the expiration date is earlier than the rest of the certifications, it will be listed on the top of the list. The selection for date user interface is different on both platforms but they both have the same functionality.

Admin Panel: The Admin panel is composed out of 3 different screens. The first one is the AdminCategoriesScreen which is the same as the Categories Screen, except for the Admin mode active label. This screen is followed by the AdminSubCategoriesScreen which navigates to the EditCatContentScreen depending on the functionality and Category selected. This includes Edit, Delete and Add of Medical information, The last screen is the EditCatContentScreen, which depending on the selected functionality it will render the right feature. This screen integrates text input boxes for title, evaluation, medication, management, symptoms, references and removal and upload of images. Furthermore, through the AdminSubCategoriesScreen you can access the CatContentScreen to see how the data was updated or created.
