What went right?

- We were able to merge the score tables into one and improved its design by adding icons similar to the mobile app and by creating hover messages next to each ingredient. Embedded messages were implemented for the page once the score is consumed. The calculated section of the page is hidden once the item is calculated. A loading icon was added to the page to show that the request from the USDA database was pending. The consume Snack function was fixed. Snack Graph design was improved.
