

Sprint Review Meeting Minutes

Attendees: James Davidovich, Giancarlo Perez, Max Garcia Del Pozo, Moiz Khatri, Ricardo Estrella

Start time: 7:45 PM

End time: 8:15 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All.

- No user stories were implemented by the time of the sprint review. However, the progress we had made which was communicated verbally was accepted by the product owner.

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Spring Planning meeting.

- 1 Fix database
 - As a developer, I want to fix the database so users can have personal accounts and login to app.
 - There are no modifications to the user story at this time that the team can think of that would improve the user story.
- 2 Formula Research and Application
 - As a developer, I want to create a formula that can score user's interactions fairly so they can compare scores.
 - One modification that could be done is to break up the user story into smaller user stories to make the acceptance criteria more precise. The creation of a formula part could become its own separate user story.
