

Sprint Review Meeting Minutes

Attendees: James Davidovich, Giancarlo Perez, Ricardo Estrella, Moiz Khatri, Max Garcia Del Pozo

Start Time: 9:00 PM

End Time: 9:30 PM

After a show and tell presentation, the implementation of the following user stories were accepted by the product owner(s): All.

- The product owner did not accept any user story that was implemented. PO wanted us to spend more time on the current user stories but prioritize new user stories that will be discussed during the next sprint planning.

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Sprint Planning meeting.

- User story 1, Formula Research
 - As a developer, I want to understand how other products have created formulas based on users' strength/speed.
 - More thoughts about how user scores should be calculated are still being investigated (straight multiplication between the two factors with some weighting).
- User Story 2, Formula Creation
 - As a developer, I want to create a formula that helps objectively judge users' performance.
 - Formulas have been created but more formula ideas are requested by the product owner.
- User story 4, Theme Research
 - As a developer, I want to understand how other products have used color combinations that help maintain user engagement.
 - The team is still researching different palettes for the UX (potentially color blind mode).
- User story 5, Theme implementation
 - As a developer, I want to implement different UI themes so that users can select which UI appearances best interests them.
 - The team has restored two other modes that the previous team had created but was not received by our current team. We will try to implement more themes.
