 **EFRT-1813** - Account settings front-end VERIFIED

 **EFRT-1820** - Account Settings Backend VERIFIED

Description

As an admin, I would like to have a tab at the far right of my dashboard for Account Settings, so that I can set some variables such as membership monthly fees, and those of Stripe and Plaid settings.

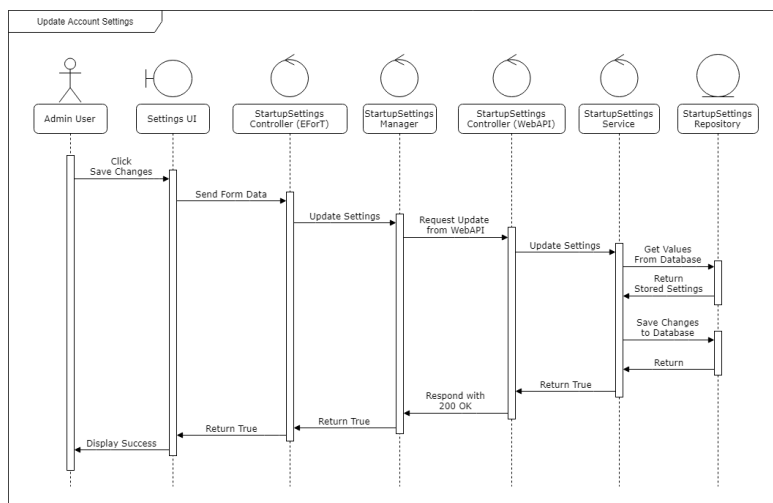

Acceptance Criteria:

- The settings should be kept in the database and should be available to any admin of the system.
- For membership monthly fee, it should accept a number in this format: 999999.99.
- For the Stripe and Plaid settings, the data should be saved in the database and be used each time the EForT site starts up and when the setting is changed on the fly, the Save/Apply button should apply all the settings.

Use Case

- Actor: Admin User
- Preconditions
 - Admin User is logged into their account in EForT.
- Description
 - Admin User navigates to the Accounts Settings page.
 - Admin User edits fields on the page.
 - Admin User clicks "Save Changes"
 - Admin User's changes are saved and the system begins using the updated information
