Confluence and HipChat were set up along with the creation of Skype accounts for virtual communication. The team also discussed roles and why we fit those roles. We discussed how E-commerce fits into the overall EForT project and the general concepts surrounding the EForT platform.

We also familiarized ourselves with the roles we chose and how they fit together within the grand scheme of EFEC.

During this meeting, no user stories were created as the first sprint will be dedicated to understanding the work done during the previous semester for this project and additionally catching up on any new technologies or tools we will need to use during this project.
