

# Short comings and WishList: Scalpy\_V6 Expert Advisor

Presenter: Anniel Apolinario

Mentor: Dr. Masoud Sajadi

Product Owner: Dr Masoud Sajadi

# Shortcomings and WishList

- Modify the EA to obtain a higher number of trades
- Optimize the EA using different time frames such as M3 M4 M6
- Modify code to work with different currencies
- Include the trailing Stop library to increase the profit
- Add different colors to the indicators
- Included a safety functionality that stops the EA if it loses too many times in a row
- Modify the code to make the EA interactive
  - Add a functionality that allows the EA to work automatically or manually (The user decides whether to trade or not )
- Add more charts in the reports, comparable to the ones generated by the strategy tester
- Create and send a CSS style sheet instead of doing in line styling
- Fix separate repeated and rushed chart file creation
