- What was done since the last scrum meeting?
 - Added code that allows the user to save their image with a specified file name
 - Added code that links a user with all of their saved files on firebase (their id, the names of the files, and the links to respective files)
 - Added code to separate image files into folders corresponding to user ids
- What is planned to be done until the next scrum meeting?
 - Add front end saved image list viewer
 - Add functionality to this front end so that clicking specific file names will load the file to the personal canvas
- What are the hurdles?
