

20180928 - Sprint 2 Review Meeting

20180928 - Sprint 2 Review Meeting Minutes

Attendees: [Cristina Alonso](#) [Hadi Alhaffar](#)[Robert Panoff](#)

Start time: 4:00PM

End time: 6:00PM

As we continue into this project, we have encountered several barriers to each approach we've tried.

Cristina demoed the functionality of the single unit paint app, the ability to change multiple colors and erase the board as well as scrolling.

Rob explained the various research and strategies we looked into, and then talked about the change in scope and possible future changes in scope and difficulties moving forward.

The current plan is to move forward with a web portal that can allow users to all port into the same instance. Our application would control the different screens being shown and allow the different remote users to communicate with each other.

As both Cristina and Rob have had no experience with Remote Desktop Protocols, there will be a lot of research that will need to be done, and possible future changes of scope.

After a show and tell presentation, the implementation of the following user stories were accepted by the product owners: All.

- User Story: Create Front End for word doc, powerpoint, join meeting, and canvas spaces
-  ~~INTR-18~~ - [DEPRECATED]User can save notes locally as an image DONE
-  ~~INTR-23~~ - [DEPRECATED]Application can be downloaded onto the raspberry pi DONE
-  ~~INTR-34~~ - User can clear all on personal notepad DONE

The following ones were rejected and moved back to the product backlog to be assigned to a future sprint at a future Spring Planning meeting.
