

Stand Up 10/24/2018

20181024 - Daily Scrum Meeting Minutes

Attendees: Nicolas Gonzalez, Emmanuel Perez

Start time: 7:30 pm

End time: 7:55 pm

@ Nicolas Gonzalez:

- What was done since the last scrum meeting?
 - figured out why the server/thread was ending immediately after starting.
 - its a bug in rpclib, `srv.run()` does not block. <https://github.com/rpclib/rpclib/issues/187>. since no block the task thinks its done and ends
- What is planned to be done until the next scrum meeting?
 - I'm going to implement the solution hack found in the github issue above
 - ```
srv.async_run();
do {
 std::this_thread::sleep_for(std::chrono::milliseconds(10));
} while (!stop);
```
- What are the hurdles?
  - now that the bug is known hopefully none

@Emmanuel Perez:

- What was done since the last scrum meeting?
  - Attempted to compile Nico's solution into a separate Unreal project but still ran into compiling errors
- What is planned to be done until the next scrum meeting?
  - Fixing the compiling error
- What are the hurdles?
  - Understanding the problem I am having with cloning Nico's repo
