

Sprint 6 Retrospective

20181123 - Sprint 6 Retrospective Meeting Minutes

Attendees: Nicolas Gonzalez, Emmanuel Perez

Start time: 2:50 pm

End time: 3:25 pm

What went wrong?

- Did we do a good job estimating our team's velocity? Yeah we estimated a good velocity for this sprint except for the live stream task.
- Did we do a good job estimating the points (time required) for each user story? Most stories had the right points, except for the live streaming, which was a bigger story than we anticipated.
- Did each team member work as scheduled? Yes, we all worked hard on our task. Nico wasn't able to complete the streaming out story.

What went right?

- We got to change the model of the car as well as place the 3 front cameras.

How to address the issues in the next sprint?

- How to improve the process? We should have split the live streaming into a smaller parts as well as anticipated that we where nearing the presentation deadline, so we had to change the focus of streaming the images into having a working demo.
- How to improve the product? We need to add more details and have the product run as a demo to demonstrate. Make it pretty.
