

# Watch the future ship — **attend on July 31**

Free, open, and fully online: Friday, July 31, 2026, 1:00–4:00 PM Eastern. See 30+ senior teams present working software across four computing disciplines.

## WHO ATTENDS

Founders scouting technical talent, engineers curious what AI-powered student teams can build in one semester, families and friends, alumni revisiting the program, and community partners exploring collaboration. No technical background needed — every team presents for a general professional audience.

## HOW TO ATTEND

- 1 **Visit [capstone.cs.fiu.edu](https://capstone.cs.fiu.edu)** and open the Showcase section for the Summer 2026 event.
- 2 **Register to attend** — a name and email so we can send you the join link and program.
- 3 **Join on July 31** and browse teams live; every project's page, poster, and video stays in the permanent public archive afterward.

## WHILE YOU ARE THERE

Search the archive — 839 projects across 41 consecutive terms since 2012. If a past product owner, judge, or graduate you know appears in your search, that is our permanent record of the community that built this program.

**[capstone.cs.fiu.edu](https://capstone.cs.fiu.edu) → Showcase**

Register in two minutes — bring a colleague who hires engineers.
