

Sponsor a team — **simple, transparent, tax-deductible**

Every dollar equips a senior engineering team with professional AI development tools for a full semester.
Three packages; one gift; a team building with the best tools available.

THE MATH, IN THE OPEN

Professional AI tooling (such as Claude) costs about **\$200 per student per month**. Over a four-month semester, with 25% program overhead, that is **\$1,000 per student**. Our teams have three to five members — so:

\$3,000

TEAM OF THREE

Full AI tooling for a 3-member senior team,
one semester

\$4,000

TEAM OF FOUR

Full AI tooling for a 4-member senior team,
one semester

\$5,000

TEAM OF FIVE

Full AI tooling for a 5-member senior team,
one semester

Want to do more? Sponsor several teams — any combination of packages. Funds are contributed before the semester begins so teams start day one fully equipped.

WHAT SPONSORS RECEIVE

- Recognition at the semester's Virtual Showcase and on the Capstone site.
- Sprint-by-sprint visibility into your sponsored team's progress on capstone.cs.fiu.edu.
- A charitable gift receipt — contributions are gifts to the FIU Foundation, Inc. (a 501(c)(3) organization), designated to the Knight Foundation School of Computing and Information Sciences Capstone Program. Many employers match gifts, doubling your impact.

HOW TO SPONSOR

- 1 **Express interest** at capstone.cs.fiu.edu → Engage, or email Prof. Sadjadi directly.
- 2 **Pick your packages** — we confirm the total and send you the one-step giving instructions (check or online link).
- 3 **Meet your team** at the start of the semester and watch them build.

capstone.cs.fiu.edu → Engage

Fall 2026 teams form in late August — sponsor commitments by mid-August equip teams from day one.
